

Goal

Website Goals:

- To entice regular gamers like me to like or have an experience on playing Farcry.
- To make regular gamers recognize Ubisoft's best game ever created.

Website Plan:

- The website will be divided into two main sections:
 - Documentation: This section will contain detailed documentation on all aspects of Farcry, including the game's quality, and highlights.
 - Tutorials: This section will contain tutorials on how to use this website, and how to download this game depending it's versions by the use of this website.
- The website will be designed to be easy to use and navigate. The documentation will be well-organized and searchable, and the tutorials will be clear and concise.

Based on my learning in w3schools, I will:

- Use HTML, CSS, and JavaScript to create a responsive and visually appealing website.
- Use PHP to create a dynamic website that can be easily updated with new content.
- Use MySQL to store and manage the website's content.
- Use SEO best practices to make the website visible in search engine results pages (SERPs).

Conclusion:

I am excited to launch this website entitled FARCRY SAGA, since this website will surely hype regular gamers who seeks a quality gaming experience with realistic graphics, good action, and great stories for vengeance.
